

Simplifying IT Complexity to Accelerate Your Success

Outcome-centric in nature and innovative at the core, TD SYNnex meets the rapidly evolving needs of our partners and their customers. We build, aggregate and facilitate solutions that bridge key and complex technologies – cloud, data, artificial intelligence (AI), Internet of Things (IoT) and security. As your solutions provider, we absorb the complexity of research and development as well as building and testing, allowing you to focus on growing your business effectively and providing better outcomes for your customers in the digital transformation era.

FIVE LEVELS OF ORCHESTRATED SOLUTIONS THAT SOLVE CUSTOMER NEEDS FASTER

We offer a range of aggregated solutions, from validated frameworks that you can customize to pre-configured solutions that are ready to deploy, and even custom solutions that are tailored to specific customer requirements.

BLUEPRINTS

Reference design for complex use cases that reduces risk and saves time.

AUTOMATED AND CLOUD-BASED

Pre-architected and repeatable Infrastructure-as-a-Service (IaaS), Software-as-a-Service (SaaS) and Platform-as-a-Service (PaaS) solutions that deploy in minutes.

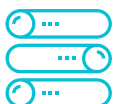

CURATED AND REPEATABLE

Pre-configured hardware and software architectures, implementation guides and tools optimized for each partner's customized delivery.

HYBRID AND INTEGRATED

Pre-validated, multi-vendor solutions designed for your customers and ranging from endpoint devices to hybrid cloud architectures.

CUSTOM

Edge-to-cloud architected solutions, consulting and services designed to meet specific business needs and span across industry segments.

ACCELERATE OPPORTUNITY, STARTING NOW

Open new doors to growth – today, tomorrow and beyond.
