TD SYNNEX

NetApp with FSx on AWS

A Click-to-Run™ Solution from TD SYNNEX

Business Challenge

Organizations often face challenges optimizing and minimizing downtime for mission-critical applications, managing workload scalability and performance, and migrating data and applications to the cloud as part of their digital transformation journey.

Help clients achieve desired outcomes by delivering a scalable and high performing solution to address their growing data sets, much easier and at enterprise scale.

Introducing TD SYNNEX NetApp with FSx on AWS

Our Click-to-Run™ solution leverages Amazon Web Services FSx Managed File System and NetApp ONTAP to simplify and accelerate workload migrations to the cloud. This powerful combination provides high-end security, reliability, scalability, and performance at a fraction of the cost compared to on-premise storage technologies.

What's more, you can provision and deploy this solution in thirty minutes or less through our StreamOne StreamOne® Cloud Platform.

Key Features

- Simple Administration with AWS or ONTAP
- Data Migration with SnapMirror Replication
- Instantaneous Cloning with FlexCone Feature
- Multi-protocol Accessibility: NFS, SMB, iSCSI

Business Outcomes

- Cost Optimization & Efficiency
- Improved Business Agility
- Manage Data More Effectively
- Hybrid Cloud Visibility & Analytics
- Migrate & Modernize Applications Faster

Why Leverage TD SYNNEX Click-to-Run™ Solutions?

Reduce Cost and Time
Reduce costs, time and risks by customizing and deploying pre-architected, validated and tested solutions.

Offer More – Get More
Enhance your portfolio and increase your revenue by offering more options and solutions to your customers.

Faster Time to Market
Receive a broad set of enablement resources to quickly build cloud solutions practices within your organization.
