

Backup on Azure

A Click-to-Run™ Solution from TD SYNnex

Business Challenge

For all organizations, implementing systems that minimize the impact of a cyberattack should be a high priority. A proactive security approach can save considerable time, costs, effort and reputational harm compared to cleaning up after the damage has occurred.

Introducing Cloud Backup on Azure

Backing up your company data has been a long-standing strategy in safeguarding company information in case of anything arises such as a ransomware attack, server crash, device loss, accidental data or files deleted and even natural disaster strikes.

TD SYNnex has developed a pre-configured solution that programmatically deploys a cost-effective, simple and reliable backup solution in the cloud, Backup on Azure. This solution offers a scalable, repeatable SMB sized and customizable option to cover multiple backup scenarios, including back-up on premise, hybrid cloud or cloud-to-cloud applications.

Key Features

- Scheduling: Regular backups, daily, weekly, monthly
- Retention: Data can be retained up-to 99 years.
- Highly Secure: Data is encrypted in your datacentre and stored encrypted on Azure the encryption key is stored and managed locally

Business Outcomes

- Cost Effective
- Scalable
- Meet Compliancy
- Protects against Ransomware
- Easy to Deploy
- Reduce set-up time and Implementation

Why Leverage TD SYNnex Click-to-Run™ Solutions?

Reduce Cost and Time

Reduce costs, time and risks by customizing and deploying pre-architected, validated and tested solutions.

Offer More – Get More

Enhance your portfolio and increase your revenue by offering more options and solutions to your customers.

Faster Time to Market

Receive a broad set of enablement resources to quickly build cloud solutions practices within your organization.
