StreamOne®
Subscription Lifecycle Management

Essential capabilities to **support customers quickly** and **seamlessly**.

Subscription lifecycle management features are **essential** for ensuring that partners can **easily manage cloud subscriptions**. StreamOne® offers all the lifecycle management capabilities partners need to support customers quickly and seamlessly, **including:**

Add/remove seats	Proration
Manage cancellations	Co-terminosity
Upgrade or downgrade subscriptions	Synchronization against native provider

Lifecycle management options very by product type and status, and StreamOne® provides all the essential options tailored to each scenario.

Simplified user experience

Discover a streamlined approach to accessing customer information with direct access to critical platform functions, with search, filtering and sorting functionality to allow for precise navigation to the information you need. With fewer clicks required to perform most common platform tasks, our partners save valuable time and effort.

Simplified multi-cloud management

StreamOne® **normalizes** multi-cloud management by integrating and standardizing vendor systems into a single, consistent view. This standardized experience with all vendors saves partners time and energy, enabling them to **efficiently** manage their cloud resources, reduce operational complexity, and focus on **driving business growth** instead of navigating disparate systems.

N-tier **pricing** management

StreamOne® provides N-Tier pricing management for its resellers to end customers through the creation of end customer Pricebooks with **customized pricing** creation based on either reseller cost or Manufacturer Suggested Retail Price (MSRP). There is also support for earned credits management and allocation, pricing logic on proration, grandfathering, free-tier and other **vast pricing capabilities**.

How StreamOne® is **better**

1
Streamlined buying experience

2
Normalization of all vendors' systems

3
N-tier Customer Pricebooks
