Stream**One**®
PSA billing reconciliation

Save time and resources
with __automated__ processes

Implementing upfront billing with your consumption-based business is an ideal way to improve cash flow and meet customer preferences. However, consumption-based pricing models **pose a challenge** as the final cost depends on actual usage, often differing from the upfront amount billed. To reconcile these discrepancies, many MSPs resort to manual reconciliation, which is time-consuming, resource-intensive, and prone to errors, potentially resulting in incomplete billing and revenue loss.

StreamOne® PSA Connectors provide a solution by enhancing efficiency and revenue while minimizing costs and errors through the Billing Reconciliation Sync feature.

This feature enables you to:

Track assets and usage together, with numbers finalized as soon as the month ends	Produce an invoice	Issue a credit or charge to the customer based on the how the invoice compares to the upfront charge

Customers can review records and make payments instantly.
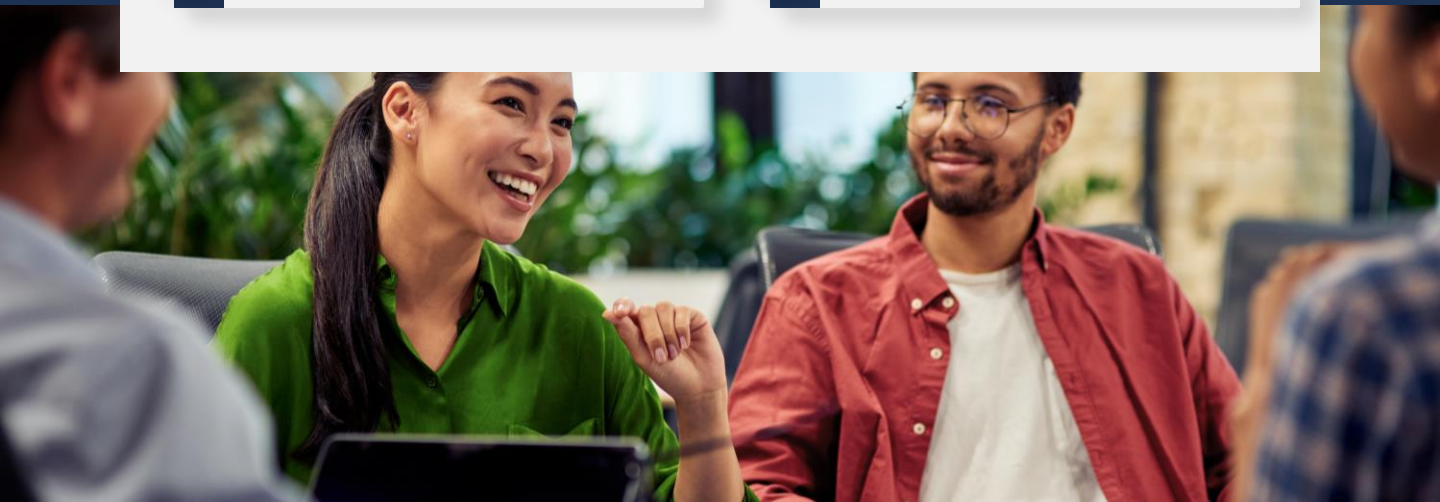

About StreamOne® PSA Connectors

Transform your business processes, enhancing efficiency with full StreamOne® data integration to your PSA of choice.

StreamOne® Commerce PSA Connectors allow you to **fully** integrate your platform data with your PSA, with advanced synchronization settings for flexible and configurable control over your cloud management.

Plus, StreamOne® provides **near real-time sync** to PSA, so you have **accurate** visibility into vendor pricing and any changes to your customer's subscriptions. With this feature, you can feel confident your data is always accurate and up to date, allowing you to expedite your billing processes for **faster time to revenue**.

StreamOne® PSA Connector capabilities include:

- Intuitive, guided installation and set-up
- Filters and notifications for error-handling
- Global synchronization settings and templates
- Configurable proration rules

- On-demand and scheduled daily sync
- Product sync including cost and price
- Real-time sync for subscription seat count changes
- Billing reconciliation sync
