Trend Micro™ Worry-Free™
Enhancing Microsoft 365 Security with XDR & Cloud App Security (CAS)

Worry-Free XDR featuring CAS significantly enhances the security of Microsoft 365 ensuring customers receive extensive protection against diverse cyber threats while safeguarding their data and critical assets.

Get protection beyond the endpoint

Worry-Free XDR provides multi-layered protection that covers various attack vectors, including email, web, endpoints, and cloud applications like Office 365. This comprehensive approach helps defend against sophisticated attacks that target different parts of the IT infrastructure.

Ransomware Takeover | Malware Installation | Vulnerability Exploits | Browser Attacks | Malicious Emails

Advanced email security & smarter protection

Email remains one of the primary attack vectors for cybercriminals, and securing email communications is critical for protecting users and organizations. Trend Micro offers advanced email security solutions that provide protection against spam, phishing, credential stealing, business email compromise (BEC), and other email-based threats, augmenting the security of Office 365's native email protection features.

Actively protects:

Exchange · OneDrive for Business · SharePoint · Microsoft Teams · Gmail · Drive · box · Dropbox

Prevent data breaches and protect sensitive data

Worry-Free XDR includes customizable Data Loss Prevention (DLP) capabilities that complement Office 365's native features that help monitor and protect sensitive data across email, endpoints, and cloud environments, reducing the risk of data breaches and compliance violations.

Optimized for Microsoft 365

Leverage CAS advanced inbound and outbound protection for both known and emerging email threats.

- Protects Microsoft Office 365 email and Gmail, along with other cloud filesharing and collaboration services

- Detects ransomware and other malware hidden in Microsoft 365 file formats or PDF documents

- Identifies BEC attacks using artificial intelligence

- Protects internal email and allows ondemand retro-scanning for mailboxes

- Gives visibility into sensitive data use with cloud file-sharing services

- Preserves all user functionality on any device with simple API integration.

Start protecting your customers with Worry-Free XDR

Microsoft 365 customers see value with Trend Micro

Since Office 365 is widely used for email communication, it's a prime target for phishing attacks. Attackers may attempt to trick users into revealing their credentials or sensitive information through fraudulent emails or websites.

Trend Micro adds more value to current Microsoft 365 customers by providing additional detections after Microsoft's standard email protection. Trend Micro has also successfully pinpointed further instances of malware, phishing attempts, BEC, and high-risk email threats that may have evaded Microsoft 365 Advanced Threat Protection (ATP).

"Always On" protection against Zero-Day and insider threats

Trend Micro's cybersecurity solutions include proactive technologies designed to detect and mitigate zero-day threats that exploit previously unknown vulnerabilities. These solutions can identify suspicious behavior and anomalous activities indicative of zero-day attacks, helping to prevent them before they can cause harm.

Continuous threat intelligence updates

Trend Micro continuously updates its threat intelligence databases with the latest information on emerging cyber threats and attack techniques. By leveraging this threat intelligence, organizations can stay ahead of evolving threats and ensure that their Office 365 environment remains protected against new and emerging security risks.

Get advanced visibility, control, and protection

Worry-Free™ XDR goes beyond endpoint security, ensuring continuous protection of your client's sensitive information and assets. It safeguards against potential breaches across multiple attack surfaces, including endpoints, mobile devices, email, cloud applications, and browsers.

Worry-Free XDR empowers you to:

- Correlate data automatically across email and endpoint in one console
- Automate detection, sweeping, hunting, and root cause analysis
- Scan emails before they arrive in inboxes
- Leverage advanced threat detection through cloud sandboxing
- Employ expanded detection, investigation, and response capabilities

Organizations with XDR:

Are better protected
Suffered half as many successful attacks over the last 12 months.

Detect quicker
65% of organization with high XDR alignment report dwell times of a few days or less.

Respond faster
58% of organization with high XDR alignment detect and respond to threats earlier.

Keep your information secure & reputation safe

Prevent cybercriminals from exploiting ransomware, phishing, malware attacks, and other forms of digital threats found in emails.

The protection you need to have peace of mind.
