TALK TRACKS

Talk Track | DraftSight Professional / Enterprise

What is it?

DraftSight Professional from Dassault Systèmes, is a proven, robust 2D CAD software solution tailored to the actual needs of design, drafting and engineering professionals. It delivers powerful 2D capability at an affordable price and is available as a standalone license for individuals or as a network licence for small- to medium-sized businesses (DraftSight Enterprise). With a range of advanced features and tools, DraftSight Professional enables users to create accurate 2D drawings, efficiently edit and annotate designs and collaborate seamlessly with team members. The software supports industry-standard file formats, promoting compatibility with other CAD tools, and provides architects, engineers and designers with a comprehensive feature set to streamline their design processes. A full suite of professional 2D tools, API, LISP Import and Macros make DraftSight Professional or Enterprise an attractive option for any business.

Benefits of DraftSight Professional

With DraftSight Professional you can create, view, edit and convert DWG, DXF and DGN files. "From the makers of SOLIDWORKS and CATIA." DraftSight from Dassault Systèmes delivers seamless integration with these and compatibility and collaboration for other systems, available on Windows and MacOS.

Quickly access commands, automatically dimension drawings, and use your favourite LISP codes for even more functionality and automation to increase productivity. Its familiar user interface and common commands enable users to be up and running in hours, not days. With the unbeatable pricing of DraftSight Professional, you reduce software costs and free up your IT budget.

Key Features of DraftSight Professional

DraftSight Professional delivers advanced 2D design functionality at an affordable price. A familiar UI and powerful functions to drive productivity for both casual and power users. Automation and productivity as standard with transfer of LISP routines, custom scripts and API Automation. All this at a great price and with DraftSight Enterprise the flexibility of networking licencing.

Who's it for?

DraftSight Professional is a cost effective solution and is ideal for students, individuals and small- to medium-sized businesses looking to save money without compromise on functionality and productivity!

For network licencing ask for DraftSight Enterprise.
