Universal Wireless Portfolio

Reduce Risk, Increase Agility, and Simplify Operations

Modern Wi-Fi networks must reliably adapt to support the needs of mobile users and devices. They need to provide always-on access to business services, allow visitors to reliably connect to guest networks, and permit mobile employees immediate access to in-house applications.

The Extreme Universal Wireless portfolio is designed to deliver enterprise-grade Wi-Fi performance to users and time-saving operational efficiencies to IT teams, ensuring best-in-class user experiences.

Why Extreme Universal Wireless?

Universal
- Increase agility, reduce costs via software-selectable operating systems and simplified licensing.

Management Your Way
- Manage One Network with ExtremeCloud public, private and edge deployment options.
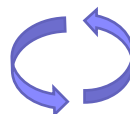

Automated and Secure
- Leverage Explainable ML to drive IT efficiency while securing the network with Universal ZTNA.

Deployment Flexibility

Extreme Wireless networks can be deployed with on-premises controllers, the cloud, or a combination of the two. Universal platforms enable the ability to seamlessly transition between on-premises and cloud operating systems based on organizational needs.
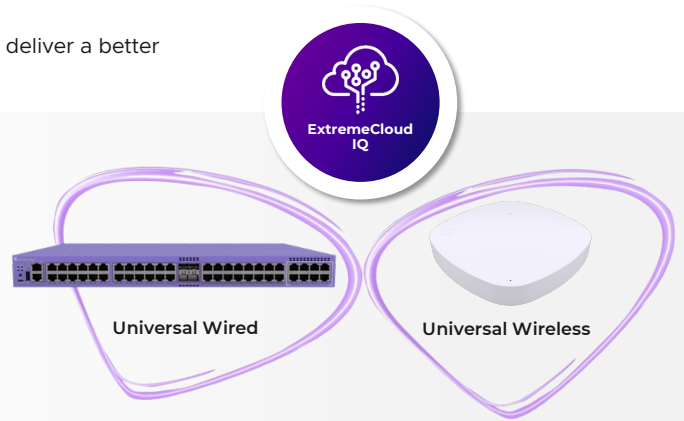

On-premises Controller   **Cloud Managed**

Extreme Universal Wired and Wireless
Designed to Work Together for Greater Outcomes

Extreme's Universal wired and wireless platforms designed to deliver a better network experience

- Holistic visibility with a common management framework through ExtremeCloud IQ.

- Unified, automated and secure Fabric services across both Wired and Wireless networks.

- Multi-gigabit (1G/2.5G/5G) along with high bandwidth uplinks (25 GB and greater) for increased 6 GHz Wi-Fi bandwidth needs.

- Power over Ethernet (PoE) switch capabilities up to 90W for 6 GHz Wi-Fi access point (AP) power requirements.

- Unifying Cloud Managed ZTNA for access point and switch security.

Wireless Products

△ Wi-Fi 6   ● 6 GHz (Wi-Fi 6E/7)

AP302W   AP305C/CX   AP3000/X

VALUE

- Wi-Fi 6E 2x2 Indoor (AP3000/X)
- Wi-Fi 6 2x2 Indoor (AP305C/CX) & Wallplate (AP302W)
- External antenna (AP305CX, AP3000X)

AP410C   AP460C   AP4000

MID-TIER

- Wi-Fi 6E 2x2 Indoor (AP4000)
- Wi-Fi 6 4x4 Indoor (AP410C) & Outdoor (AP460C)
- Sector antenna (AP460S)

AP5010   AP5050U/D   AP5020

PREMIUM

- Wi-Fi 7 4x4 Indoor (AP5020)
- Wi-Fi 6E 4x4 Indoor (AP5010) & Outdoor (AP5050U/D)
- Underseat (AP5050U)
- Directional antennas (AP5050D)

Additional Extreme Benefits

Extreme Fabric

Each Extreme access point includes built-in Fabric capabilities that enable them to automatically connect to Extreme's Fabric solution for secure end-to-end services.

ExtremeCloud IQ

ExtremeCloud IQ optimizes wireless operations by capturing meaningful AI/ML-informed security insights from wireless network.

Services

Extreme Services are 100% in-sourced, 7/24/365 global IT experts ready to simplify and modernize your IT environment.

Summary

The Universal Wireless portfolio is part of Extreme's Infinite Enterprise strategy comprised of One Network, One Cloud, and One Extreme. One Network connects everyone, everywhere – securely through universal platforms – wired, wireless, SD-WAN with security and fabric. One Cloud enables unified management of everything, with AI – for both Extreme and non-Extreme, wired, wireless, SD-WAN, security, fabric, and IoT. One Extreme provides additional programs that enable customer success and lifetime value.
