

Discover the right solution to **secure** your customers

Help customers maximise the value of their Microsoft licensing and offer advanced managed security to reduce their cyber risk.

Managed Security for Microsoft 365

Cyber attacks are increasing in speed and sophistication and as a result, customers are looking at how to effectively manage cyber threats. Many organisations are also looking at how they can use the security solutions available within Microsoft 365 to better protect themselves and reduce risk.

TD SYNEX and Chorus offer Microsoft Managed Extended Detection & Response (MXDR) services built on Microsoft, which you can quickly and easily **resell to your customers**. This allows you to add managed security services onto your customers existing Microsoft licensing, or even support upsell opportunities - all whilst giving your customers a service that keeps them ahead of cyber threats.

Benefits to you

- Meet growing customer demand and increase customer loyalty
- Add a new annuity revenue stream and open new opportunities
- Support Microsoft licensing renewals and upselling
- Take away the risk, time and investment required to deliver MDR & MXDR

Service Levels

	MDR Endpoints	MXDR Advanced	MXDR Premium
Ideal licensing	Microsoft 365 Business Premium or Defender for Endpoint P2	Microsoft Business Premium & Defender add-ons or E5 Security	Microsoft 365 E5 + non Microsoft data sources
Protection coverage	Endpoints	Endpoints, identity, networks, apps & data within Microsoft	Endpoints, identity, networks, apps, data & non-Microsoft sources

About Chorus

We help MSPs globally to quickly and easily deliver advanced managed security services built on Microsoft Security via our UK-based 24x7x365 CSOC and partner channel model.
