# TD SYNEX Vendor Branded Services

## Who are we?

We realize it's nearly impossible for OEM hardware and software partners, along with resellers, to employ enough resources to deliver coverage both from a geographic and solution stack standpoint.

**Determine Vendor Needs & Identify How Services Can Meet Those Needs**

That's where our Vendor Branded Solutions step in to help. We make it possible to launch Professional Services, Field Installations, Help Desk and numerous other solution stacks all focused on your brand.

**Structure Support Teams, Create Service Offerings & Quarterly Reporting**

## Why vendor branded services?

Think of us like your OEM solutions "easy button".

We want to support our partners in creating a full solution for their partners. Whether this looks like expanding your technical bandwidth or creating go-to-market strategies for new products or offerings, we are here to help.

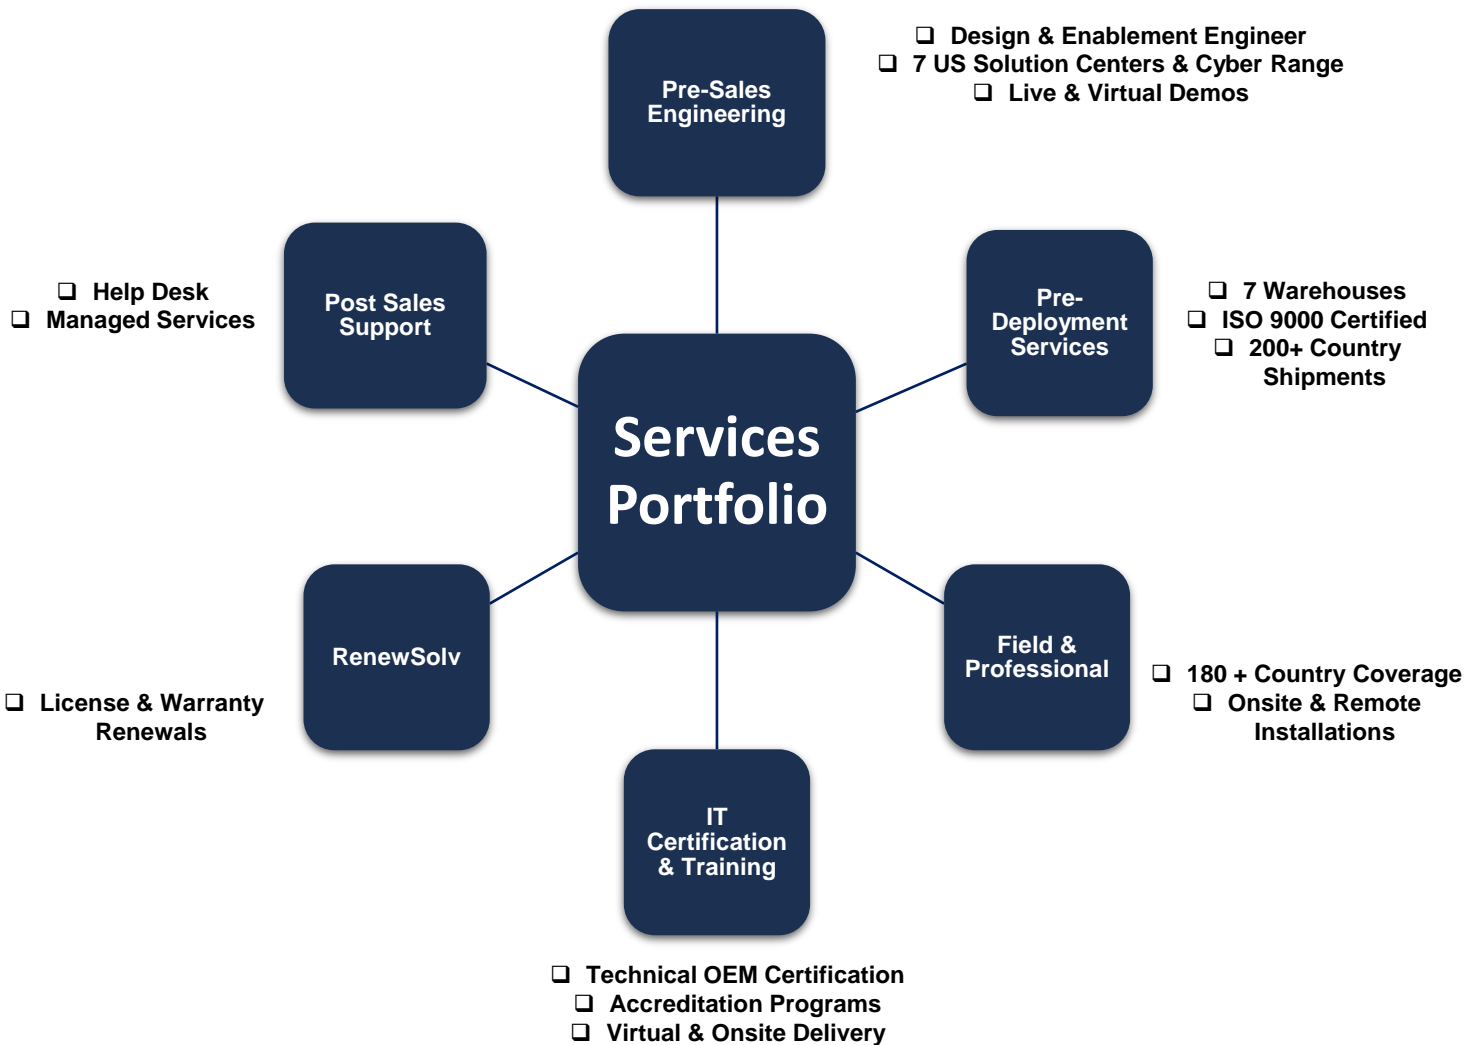

**Create Marketing Deliverables & Educate BDs/PMs to Evangelize Offerings**
